

Khaled El Nagdy

Analytics Engineer | BI Developer

📍 Cairo, Egypt ✉ knagdyknagdy@gmail.com ☎ +(20)1004821893 🔗 [linkedin.com/in/nagdii](https://www.linkedin.com/in/nagdii)

Analytics Engineer with 3+ years building end-to-end analytics solutions across Snowflake, dbt, and Power BI. Strong in scalable data modeling, SQL transformation, and executive reporting for international stakeholders. Comfortable owning the pipeline from raw source to decision-ready dashboard, and translating business requirements into reliable data architecture in Agile teams.

Professional Experience

Analytics Engineer, FlairsTech

04/2024 – 08/2026 | Cairo

- Built end-to-end analytics solutions in Snowflake, dbt, and Power BI, converting raw source data into scalable, analytics-ready models that power business-critical reporting for international stakeholders.
- Engineered semantic models with DAX and Power Query (M), improving refresh performance, maintainability, and accuracy across reporting layers.
- Built and maintained data pipelines integrating REST APIs, SQL Server, and multiple external sources, delivering consistently refreshed insights for reporting.
- Automated monitoring and alerting in Power Automate, surfacing data anomalies before publication and reducing manual validation effort.
- Optimized SQL queries, stored procedures, and scheduled jobs, improving report refresh efficiency and processing consistency.
- Developed executive dashboards and paginated reports in Power BI and Sigma Computing, serving stakeholders across Planning, Sales Ops, Finance, Marketing, and Executive teams.

Business Intelligence Developer, Dukan

02/2025 – 04/2025 | KSA (3-month contract)

- Delivered executive dashboards and paginated reports in Power BI and Report Builder, supporting finance and strategic decision-making.
- Partnered with Finance leadership to audit reporting workflows and surface scalability and performance gaps.
- Proposed an analytics modernization roadmap covering data architecture, governance, and reporting efficiency.
- Standardized semantic models and measures and tightened deployment and version control using Tabular Editor.

E-Business Reporting Executive, QNB AL-AHLI

07/2023 – 04/2024 | Cairo

- Built and maintained enterprise Power BI dashboards and paginated reports tracking marketing campaigns, KPIs, and performance metrics across departments.
- Ran ETL with SQL and PL/SQL across SQL Server and Oracle, ensuring accurate, structured extraction within a regulated banking environment.
- Designed DAX measures and Power Query transformations to improve reporting accuracy and usability.
- Replaced a manual daily refresh with automated, scheduled report distribution and row-level security (RLS) KPI delivery to Marketing, Executive, and POS teams using Power Automate.
- Resolved data discrepancies to maintain integrity across regulated reporting.

Frontend Developer, IntraZero

12/2022 – 06/2023 | Cairo

- Built responsive web applications with React, HTML, CSS, and REST APIs in an Agile team, collaborating with backend developers and designers to ship production features.
- Optimized front-end performance and cross-browser compatibility; managed Git-based version control.

System Analyst, IntraZero

06/2021 – 11/2022 | Cairo

- Gathered and documented business and technical requirements for web and mobile systems.
- Produced UML diagrams, ERDs, and technical specifications across SDLC phases in Agile project teams.

Internships

Intensive Training Program (ITP), Data Visualization Track Information Technology Institute

11/2020 – 02/2021 | Cairo

Education

BSc. Of Business Administration - English Section, Helwan University

2016 – 2020 | Cairo

Courses

The Business Intelligence Analyst Course 2021, Udemy

2021

The Data Science Course 2021: Complete Data Science Bootcamp, Udemy

2021

Data Challenger Track in Data Analysis, (FWD)

2021

Technical Skills

Data & Warehousing:

Snowflake, dbt, SQL, SQL Server, Oracle, PL/SQL

Data Modeling & Transformation:

Data modeling, semantic models, star schema, DAX, Power Query (M)

Workflow:

Git, Agile / Scrum

BI & Visualization:

Power BI, Paginated Reports (Report Builder), Sigma Computing

Automation & Integration:

REST APIs, Power Automate, Microsoft Fabric, Tabular Editor

Languages

- Arabic (native)
- English (fluent)
